Online Observational and Experimental Data Collection Methodology
Webinar February 4, 2021 – Speaker Biographies

Jamie Druckman, Ph.D., is the Payson S. Wild Professor of Political Science at Northwestern University. He has published over 130 articles and books of his own work, including work on experimental methods and public opinion formation. He co-edited *Public Opinion Quarterly* and *Political Psychology* and is the co-Principal Investigator for Time-sharing Experiments for the Social Sciences- or TESS, which is the focus of his presentation. druckman@northwestern.edu

Marjorie Rhodes, Ph.D., Professor of Psychology at New York University and director of Discoveries Online, a virtual lab for child development research. Her work focuses on conceptual development and social cognition, and is supported by the NSF and NICHD. marjorie.rhodes@nyu.edu

Benjamin Katz, Ph.D., is Assistant Professor of Adult Development and Aging within the Department of Human Development and Family Science at Virginia Tech. His research focuses on how interventions and experience, including non-invasive brain stimulation, cognitive training, and lifestyle change, may improve the cognitive capacities that support learning, reasoning, and decision making. Prior to his time in academia he worked as a game designer. katzben@vt.edu

Guest expert for AmeriSpeak (Q&A)
Dan Costanzo is Senior Manager at NORC at the University of Chicago, an independent, non-partisan research institution, and is part of the team that administers NORC's AmeriSpeak Panel, used in TESS. Costanzo-daniel@norc.org
